

6" MT Architectural Loudspeakers

High-Fidelity In-Wall
Speaker Systems

SpeakerCraft®

We Blend The Sounds You Enjoy With The Life You Live.

SpeakerCraft provides beautiful music, home theater, the weather, traffic, even talk radio, in every room of your home.

To hear conventional speakers you must stay in front of them, confined to the room where they are. SpeakerCraft architectural speakers allow you to listen to your favorite CDs, digital audio, tapes and radio anywhere living takes you. In any room of your home, you'll have the entertainment you want hidden away from sight. From the very beginning, SpeakerCraft has been the progressive and innovative leader; we pioneered the in-wall speaker industry.

We continue to push the limits of what is possible for custom installation products. Our speakers not only sound awesome and disappear into your decor, but they are, hands down, the best architectural speakers on the market.

The quest to develop the best sounding products is relentless, and is driven by four simple things - our dealers, great sound, easy installation and exceptional value. The same motivation that elevated us from a small garage 25 years ago to our modern facilities continues to be shown in our dedication and commitment to our customers. We know that when our products are installed, they will provide listening pleasure for years to come, as they always have and always will.

You can depend on us... We've manufactured millions of custom installation products and pledge that every product we build will give you the highest level of workmanship and sound performance. Our commitment to quality is matched only by our warranty... Lifetime!

The Difference is Innovation!

Inverted Design

By placing the tweeter at the bottom of the speaker, the new MT series is configured to "steer" the high frequencies properly toward the listener, resulting in improved imaging and an increased sound stage. The Mirror Image Technology (MT) series speakers are sold as a matched pair, one with the tweeter on the right side and one with the tweeter on the left side.

Tweeters and Woofers

Our choice of rare earth, high performance materials like neodymium, silk and magnesium make SpeakerCraft speakers sound great.

All the tweeters in the MT series can be aimed a full 30° in any direction to improve sound quality and increase placement options.

Adjustment Switches

Many of the MT speakers feature easy to use equalization circuitry. This allows your installer to fine tune the bass and treble to your listening taste. These adjustments also compensate for room acoustics.

6" Mirror Image Technology Series

MT FOUR

Woofers 6½" Aluminum/Magnesium Cone with Dual Voice Coil, Rubber Surround, and Front-Mounted 3 Position ±3dB Bass Adjustment Switch
Tweeter 1" Pivoting Aluminum/Magnesium Dome with Neodymium Magnet and Front-Mounted 3 Position ±3dB Treble Adjustment Switches
Sensitivity 90dB 1W/1m
Frequency Response 37Hz - 20kHz ± 2dB
Impedance 8/6/4Ω, Depending on Switch Position
Power Recommendations 150 Watts (undistorted)

MT THREE

Woofers 6½" Aluminum Cone with Dual Voice Coil, Rubber Surround and Front-Mounted 3 Position ±3dB Bass Adjustment Switch
Tweeter 1" Pivoting Aluminum Dome with Neodymium Magnet and Front-Mounted 3 position ±3dB Treble Adjustment Switch
Sensitivity 90dB 1W/1m
Frequency Response 40Hz - 20kHz ± 2dB
Impedance 8/6/4Ω, Depending on Switch Position
Power Recommendations 125 Watts (undistorted)

MT TWO

Woofers 6½" Glass Composite Cone with Rubber Surround
Tweeter 1" Pivoting Silk Dome with Neodymium Magnet and Front-Mounted 3 position ±3dB Treble Adjustment Switch
Sensitivity 92dB 1W/1m
Frequency Response 40Hz - 20kHz ± 2dB
Impedance 8Ω
Power Recommendations 120 Watts (undistorted)

MT ONE

Woofers 6½" Polypropylene Cone with Rubber Surround
Tweeter 1" Pivoting Silk Dome
Sensitivity 92dB 1W/1m
Frequency Response 40Hz - 20kHz ± 2dB
Impedance 8Ω
Power Recommendations 100 Watts (undistorted)

All SpeakerCraft speakers are weather resistant and easy to paint
